PROJECT

Algorithms Class Project — Ant Hill Elimination

August 2022 - January 2023

- Implemented the Depth First Search algorithm to solva a graph traversal problem in C
- Utilized a recursive approach to efficiently traverse a graph with a large number of nodes
- The program takes input in the form of an adjacency matrix or adjacency list and outputs the traversal order

EXPERIENCE

Sam's Club — Cafe Worker

Jan 2020 - Present

- Greet and serve customers with a positive attitude and outstanding customer service
- Prepare and serve frozen yogurt, icee, and other beverages, as well as a variety of baked goods and light snacks
- Maintain a clean and organized cafe, including countertops, tables, chairs, and floors
- Manage cash register transactions accurately, reconcile receipts, and maintain a secure cash environment
- Reorder supplies as needed and ensure that inventory is accurately tracked and restocked
- Follow all health and safety regulations, including food handling and sanitation procedures
- Support the management team in achieving sales goals and providing an exceptional customer experience.
